

Dear Parents,

We are excited to begin our new group project called "**Discover a Country**"! The objective of this project is to create awareness about the different cultures of the world.

Each group of 3-4 students will research information about a country and create **either a poster or a 3D model house** showing what life is like there. They'll explore the country's population, language, food, clothing, and tourist spots—and then share their creations with the class during a "World Tour Walk"!

To help your child participate fully, please check the list of materials that each child must bring to class .

**For the poster's option,**

- 1 large sheet of paper or poster board
- Crayons, colored pencils, or markers
- Glue stick and scissors
- Pictures from magazines or printed images

**For model house's option:**

- 2 small cardboard boxes (like a shoebox)
- Pictures from magazines or printed images
- Colored paper
- Tape or glue
- Playdough or modeling clay (optional)

We'll be working on this project in class over the next weeks. Thank you for helping us make learning creative and meaningful!

Warm regards,
