

Title: Global Perspective Project - Jobs- Part 1

Dear Parents,

In our upcoming class, students will take part in an exciting project designed to strengthen their **research and collaboration skills**. Working in groups, each student will explore a specific job assigned by the teacher, **gather information**, and share their findings with classmates. This hands-on approach encourages students to **investigate information, work together, and express their ideas confidently**.

Student Responsibilities:

- Each student will **search for and bring pictures no more than (10x10 cm)** that answer the question assigned to them.
- Your child should be **ready to discuss their findings and share their thoughts** with their group.

Through this project, students will **collaborate, exchange ideas, and gain a deeper understanding of the job assigned to them**.
