October

Dear parents

This month our ScratchJr program has continued to make significant strides in introducing young learners to the fundamentals of coding through interactive projects and creative exercises.

We introduced the following coding skills:

Look Blocks

- Grow
- Shrink
- Show
- Hide
- Reset size

Drive across the city

"Our first project in Scratch Jr was all about driving a car through city, and we used different coding blocks to control the car's movements!"

Computer Teacher
