

## Student's Book p.177

### Look Back

Izzy has 2 plates of 4 oranges.

How many oranges does she have altogether?

Write a multiplication sentence to show.

number of groups  $\times$  number of items = product

$$2 \times 4 = 8$$

2 plates  $\times$  4 oranges = 8 oranges altogether

Student's Book p.177

## Thinking Cap

Ralph puts 8 oranges equally on 2 plates.  
Write a division sentence to show.

What can you say about the division sentence and the multiplication sentence?

$$8 \div 2 = 4 \text{ oranges in each plate}$$
