

## Look Back

Eddy and Caz share the sweets equally.  $\div$

How many sweets does each of them get? **7**

Write a division sentence.

$$14 \div 2 = 7$$

Help your friends when they need.

**P.127**

how many sweets are there? **14**

how many people are sharing them?

**2**

## Thinking Cap

18 sweets are shared equally among

a group of children.

2 in each group

Each child gets 2 sweets.

How many children are there? **9**

Use unit cubes to show your answer.

P.127

$$18 \div 2 = 9$$

## Let's Learn

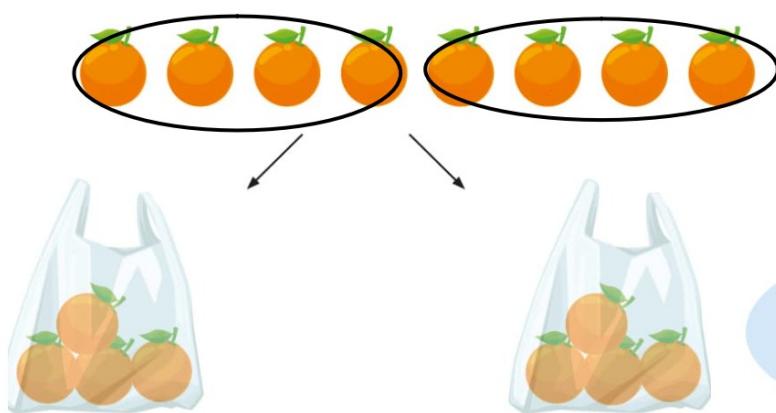

P.128

Bella has 8 oranges.

each bag will have 4 → we circle every 4 oranges together

She puts the oranges into bags of 4.

How many equal bags will there be?

$$8 \div 4 = 2$$

Put 4 oranges into a group.  
Do this until all the oranges  
are put into groups.

## P.128

To find the number of bags, you divide 8 by 4.

$$\begin{array}{r} 8 \\ \div \\ \text{total number of oranges} \end{array} \qquad \begin{array}{r} 4 \\ = \\ \text{number of oranges in each bag} \end{array} \qquad \begin{array}{r} 2 \\ \text{number of bags} \end{array}$$

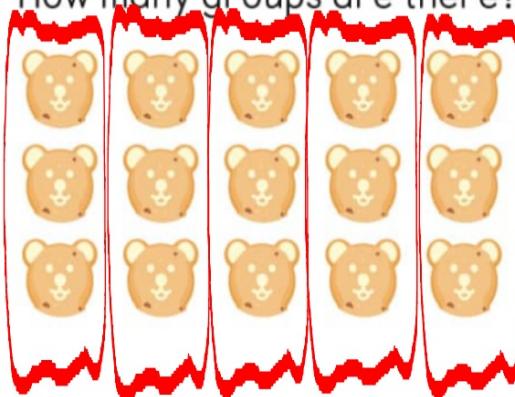

There are 2 equal bags.

P.129

## Let's Practise

I Circle to make equal groups of 3.

How many groups are there?

$$15 \div 3 = \underline{\quad} \textcolor{red}{5} \underline{\quad}$$

P 129

2 Lily packs 20 marbles in some bags.  
Each bag has 4 marbles.

How many bags does Lily use? 5

3

I have more than 6 friends. I give 2 cards to each friend.

Izzy has fewer than 15 cards.

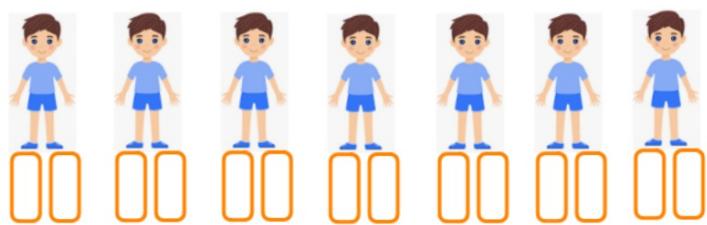

How many cards does Izzy have? **14**

How many friends does she have? **7**

Show your partner how you know.

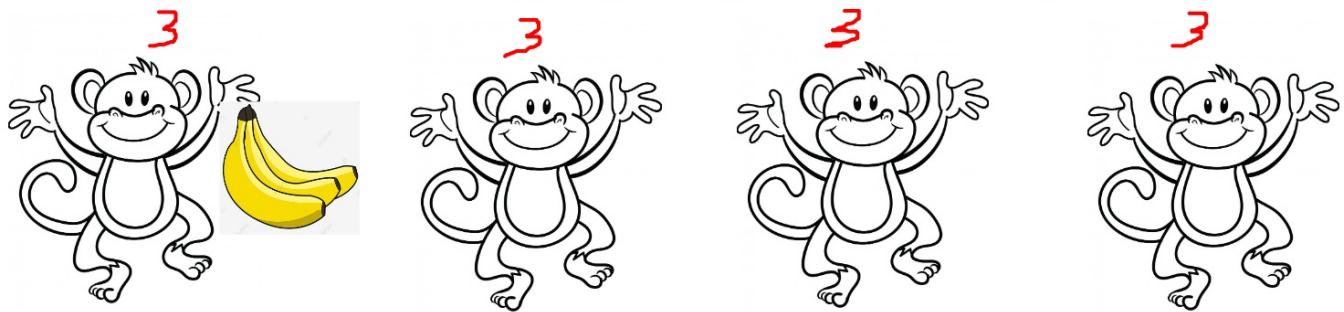

7 friends (more than 6 )

1 4 cards ( fewer than 1 5 cards)

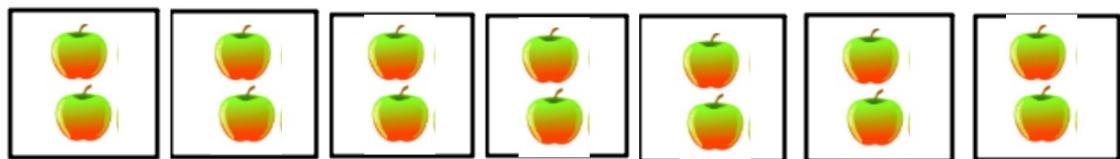

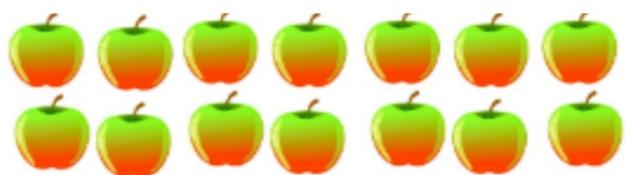

Naser shared some bananas equally among the shown monkeys in the picture .

- Complete the drawing.
- Write the division sentence he used to find out how many bananas each monkey got.

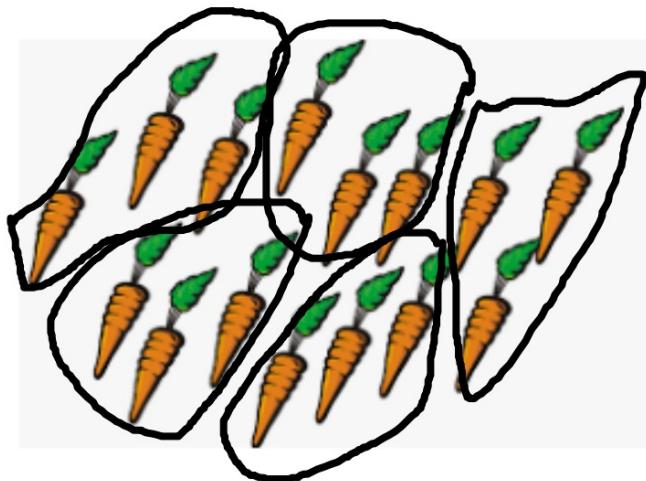

$$\underline{12} \div \underline{4} = \underline{3}$$

Lena wants to share the apples into her 7 children ,  
Write the division sentence to find how many apples does each child get ?

$$\frac{14}{\cdot} \div \frac{7}{\cdot} = \frac{2}{\cdot}$$

Rana wants to share the carrots into her children , each one of them will get 3  
Write the division sentence to find how many children does she have ?

$$\frac{15}{3} = 5$$
