

Date: _____

Chapter 12, Lesson C :

Divide 2-Digit Numbers by 2, 3, 4 and 5 (12.C.2)

a) $60 \div 2 = 30$
 $6 \div 2 = 3$ so $60 \div 2 = 30$

$$\begin{array}{l} 3 \times 11 = 33 \\ 3 \times 12 = 36 \end{array}$$

b) $35 \div 3 = 11 \text{ R } 2$
 35 is between 33 and 36 in the times table of 3 .
 $33 \div 3 = 11$ $35 - 33 = 2$
 $35 \div 3 = 11 \text{ R } 2$

c) $72 \div 4 = 18$

```
graph TD; 72[72] --- 40[40]; 72 --- 32[32]; 40 --- 10[10]; 32 --- 8[8]; 10 --- 18[18]; 8 --- 18
```

$$\begin{array}{l} 40 \div 4 = 10 \\ 32 \div 4 = 8 \\ 10 + 8 = 18 \end{array}$$

d)

$$\begin{array}{c} \boxed{85} \div 5 = 17 \\ \swarrow \quad \searrow \\ \boxed{50} \quad \boxed{35} \end{array}$$

$$\begin{array}{l} 50 \div 5 = 10 \qquad 35 \div 5 = 7 \\ 10 + 7 = 17 \end{array}$$

e)

$$\begin{array}{c} \boxed{78} \div 3 = 26 \\ \swarrow \quad \searrow \\ \boxed{60} \quad \boxed{18} \end{array}$$

$$\begin{array}{l} 60 \div 3 = 20 \qquad 18 \div 3 = 6 \\ 20 + 6 = 26 \end{array}$$

1 will give a remainder.

Q2. Jasmine has 48 flowers.

She wants to put 5 flowers in each vase.

Her mother says she will need about 10 vases.

Is she correct? Show your work.

48 is close to 50.

$$50 \div 5 = 10$$

Yes, Jasmine's mother is correct.

$$\begin{array}{r} 48 \div 5 = 9 \text{ R } 3 \\ \begin{array}{r} \diagup \quad \diagdown \\ 45 \quad 3 \end{array} \end{array}$$

42

48 is not a multiple of 5.
Multiples of 5 have 0 or
5 in the ones place.

$$45 \div 5 = 9$$

$$8 \times 5 = 40$$

$$9 \times 5 = 45$$

$$10 \times 5 = 50$$

48 is between
45 and 50

$$3 < 5 \text{ so } R=3$$

10 vases are needed.

3. Matt brings out 4 cups of tea each time he goes to the kitchen.
He needs to bring out 26 cups of tea altogether.
Matt says, "I need to go to the kitchen 6 times."

a. He is incorrect. Correct his statement.

I need to go to the kitchen 7 times.

b. Explain how you got your answer.

$$\begin{array}{r} \boxed{26} \div 4 = 6 \text{ R } 2 \\ \boxed{24} \quad \boxed{2} \end{array}$$

$$24 \div 4 = 6$$

2 is less than 4 so it is the remainder

Matt needs to go to the kitchen 6 times to bring out 4 cups of tea each time and 1 time to bring out 2 cups of tea only.

4. A baker puts 64 cookies into bags.
He puts 4 cookies in each bag.
How many bags does he need? Show your work.

$$\begin{array}{c} \boxed{64} \div 4 = 16 \\ \swarrow \quad \searrow \\ \boxed{40} \quad \boxed{24} \end{array}$$

$$\begin{array}{l} 40 \div 4 = 10 \qquad 24 \div 4 = 6 \\ 10 + 6 = 16 \end{array}$$

_____16_____ bags
