

Student's Book p.93

A

Sound, Light and Heat

In this section, I will

- learn that energy is present in all matter, and in sound, light and heat
- learn that energy is needed to make things move
- create tables and diagrams to show observations
- learn to sort and classify things through observations
- identify the five main types of scientific enquiry

Thinking cap

I wonder why I feel warm when I stand near a lamp...

The lamp is giving off heat energy and light energy.

Give other examples of objects that give off heat energy.

The Sun, a candle, ovens, campfire
