Chapter 12, Lesson C: Divide 2-Digit Numbers by 2,3,4 and 5 (12.C.4)

Q1. Find the product and the quotient.

$2 \times 9 = \underline{\quad}$

$18 \div 2 = \underline{\quad}$

$9 \times 4 = \underline{\quad}$

$36 \div 9 = \underline{\quad}$

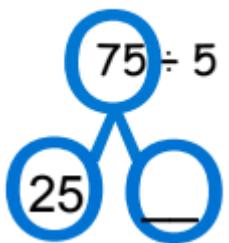

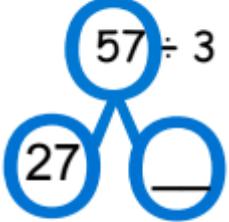

$9 \times 8 = \underline{\quad}$

$72 \div 9 = \underline{\quad}$

$6 \times 6 = \underline{\quad}$

$36 \div 6 = \underline{\quad}$

Q2. Use the number bond to help you find the quotient.

 $75 \div 5 = \underline{\quad}$ $80 \div 4 = \underline{\quad}$ $88 \div 8 = \underline{\quad}$  $57 \div 3 = \underline{\quad}$ $66 \div 2 = \underline{\quad}$ $28 \div 2 = \underline{\quad}$

Q3. What are the missing numbers? **r**= remainder

$23 \div 4 = \underline{\quad} \text{ r } \underline{\quad}$

$27 \div 5 = 5 \text{ r } \underline{\quad}$

$32 \div 3 = \underline{\quad} \text{ r } \underline{\quad}$

$24 \div 5 = \underline{\quad} \text{ r } \underline{\quad}$

$27 \div 6 = 4 \text{ r } \underline{\quad}$

$32 \div 5 = \underline{\quad} \text{ r } \underline{\quad}$

Q4. **Share** 27 oranges among 4 children.

How many oranges does each child get?

How many oranges are **left** over?

Solve: _____

- Each child gets _____ oranges.
- _____ oranges are left over.

Q5. Place 18 pens **equally** into 9 boxes.

How many pens are there in **each** box?

_____ pens
