

Look Back

Student's Book p.181

Ralph drinks 2 cups of milk every day.

day 1	2 cups
day 2	2 cups
day 3	2 cups
day 4	2 cups
day 5	2 cups

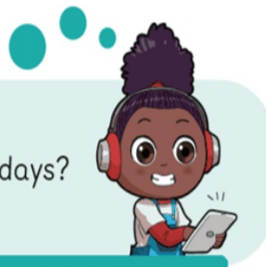

How many cups of milk does he drink in 5 days?

$$2 \text{ cups} \times 5 \text{ days} = 10 \text{ cups}$$

Thinking Cap

Izzy drinks 4 cups of water every day.
How many cups of water does she drink in 30 days?
How do you find out? Show your partner.

$$4 \text{ cups} \times 30 \text{ days} = 120 \text{ water cups}$$
