

## Thinking Cap

Student's Book p. 192

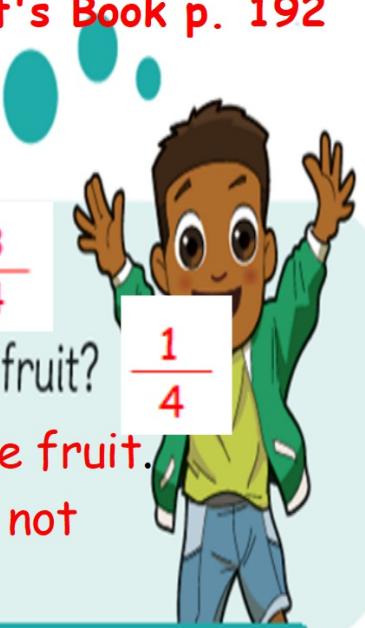

What fraction of the pancake has fruit?  $\frac{3}{4}$

What fraction of the pancake does not have fruit?  $\frac{1}{4}$

Why do you say so? 3 parts of 4 have fruit.

Convince your partner. 1 part of 4 does not have fruit.

$$\frac{3}{4} + \frac{1}{4} = \frac{4}{4} = 1 \text{ whole}$$
