

Each snack bar is divided into 4 equal parts since there are 4 children. **Student's Book p. 201**

## Let's Learn

Ron, Izzy, Eddy and Caz share 3 snack bars equally.

snack  $\frac{3}{4}$  children  
bars

This shows  $3 \div 4$ .

Each child gets  $\frac{3}{4}$  of a snack bar.

$$\text{So } 3 \div 4 = \frac{3}{4}$$

$\frac{3}{4}$  ← Dividing line

The dividing line of a fraction separates the numerator and denominator.
