

Look Back

p.112

Caz has 4 strawberry and 5 chocolate cupcakes.

How many cupcakes does Caz have altogether? **Caz has 9 cupcakes.**

p.112

Thinking Cap

Caz and her friends eat 2 strawberry and 3 chocolate cupcakes.
How many cupcakes are left?
Use unit cubes to show how you work out the answer.

Caz has 9 cupcakes.

5 cupcakes are eaten. $9-5=4$

There are 4 cupcakes left.

Let's Learn

a There are 4 books.

Subtract 2 books from 4 books.

There are 2 books left.

Subtract means **take away**. You can cross out the 2 books to show that they are taken away.

b There are 18 buttons.

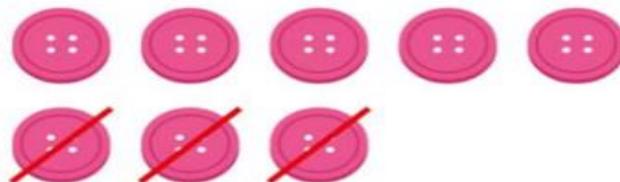

Take away 3 buttons.

How many buttons are left?

$$18 - 3 = 15$$

15 buttons are left.

What is another way to subtract 3 from 18?

We can count back in 1s from 18.

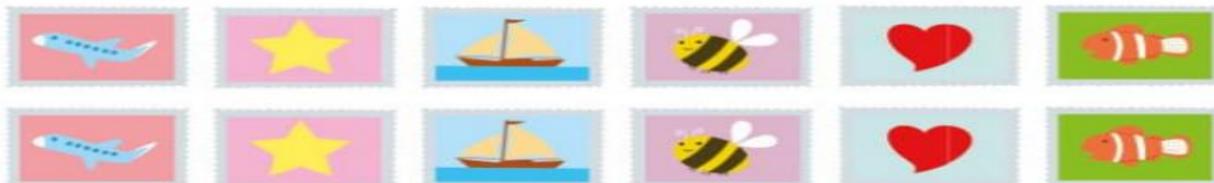

Let's Practise

1 Take away 2 pears from 7 pears.
How many pears are left?

5 pears are left.

2 Gary has 12 stamps.
He gives away 3 stamps.
How many stamps has he left?

$$\underline{12} - \underline{3} = \underline{9}$$

He has 9 stamps left.

3 Jane has 15 beads.
She gives away 4 beads.
How many beads are left? 15-4=11
Draw to show your answer.
