

What shapes can you see in the trolley?

How do you know?

*a sphere ,hexagon ,cuboid and a cylinder*  
*(football) (clock) (cereal) (chips)*

## Thinking Cap

What do you think the bottom of the container for apple chips look like? **circle**  
Find similar objects around you that have the same shape.

## What Shapes Can You Find?

Eddy sees different shapes in his classroom.

This clock is a square.

This shelf is a **hexagon**.

This pencil case is a cylinder.

This toy is a **cone**.

What other shapes can you find in Eddy's classroom? How do you know?

## Let's Practise

1 Name the shape of each object.

a

octagon

b

cuboid

Do you agree with your partner's answers? Why or why not?

2

A

B

What is the same and what is different between A and B?

What object has this pattern? honeycomb

Same - A and B are both made from hexagons.

Different - A and B have different colours

3 Raj sorts some objects in this way.

Explain why Raj sorts them this way.

The objects in the first box have a pointed top ,  
whereas the objects in the second box have flat  
surfaces.
