

## Let's Review

I Look at the objects below.

Circle the object that does not belong to the group. Explain why the object does not belong to the group.

a Transparent

fish bowl

cooking pot

magnifying glass

Reason: It is opaque

b Translucent

sunglasses

vase

wooden plate

Reason: It is opaque

c Opaque

brick wall

handbell

plastic folder

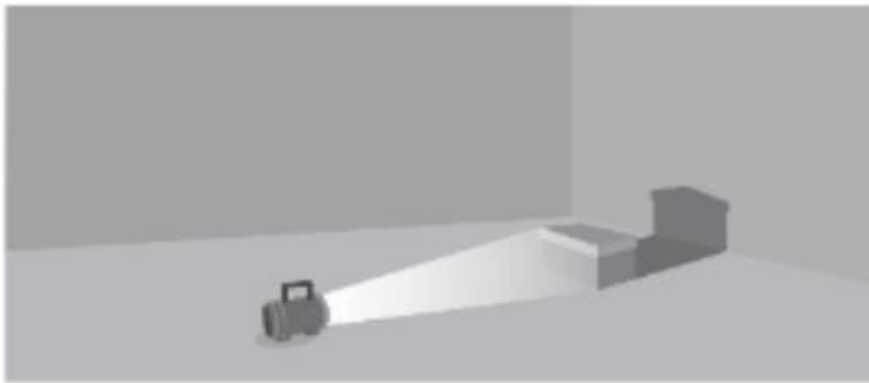

Reason: It is transparent / translucent

2 Complete the sentences below. Choose from the following words.

blocked light source opaque  
shadows translucent

shadows are formed when light is blocked  
by some objects. These objects can be opaque or  
translucent

3 Look at the picture below.

What happens to the shadow of the box when the torch is moved closer to the box? Circle the correct answer.

**the shadow becomes bigger**

the shadow becomes smaller

the shadow disappears

the shadow remains the same
