

Let's Practise

Student's Book p. 219

I Add. Use the diagram to help you.

Estimate the sum
before you add.

a $\frac{2}{10} + \frac{1}{10} = \frac{3}{10}$

b $\frac{2}{10} + \frac{2}{10} = \frac{4}{10} = \frac{2}{5}$

c $\frac{4}{10} + \frac{5}{10} = \frac{9}{10}$

d $\frac{2}{10} + \frac{8}{10} = \frac{10}{10} = 1$

2 Add. Use the diagram to help you.

a $\frac{4}{8} + \frac{1}{8} = \frac{5}{8}$ _____

b $\frac{3}{8} + \frac{5}{8} = \frac{8}{8} = 1$

3 Fill in the blanks with different fractions.

a $\frac{3}{5} + \frac{2}{5} = 1$

b $\frac{5}{7} + \frac{2}{7} = 1$

Student's Book p. 219

- 4 Sue eats $\frac{2}{5}$ of a banana cake.

Jay eats the same amount of banana cake as Sue.

There is $\frac{1}{5}$ of the banana cake left.

What fraction of the cake was there in the beginning?

Draw a diagram to show your working.

Tick (✓) to show what you can do.

I can add fractions with the same denominator.

Activity Book
Worksheet I5B

$$\frac{2}{5} + \frac{2}{5} = \frac{4}{5}$$

There is 1 whole cake at first.

$$\frac{1}{5} + \frac{4}{5} = \frac{5}{5} = 1$$
