

Find $\frac{1}{2}$ and $\frac{1}{4}$ by Dividing (13.C.1)

p. 23

Date : _____

Q.1) Match these numbers to their halves.

Q.2) Jane, Putri, Michael and Ahmad shared 8 sweets equally.

Jane says that each of them will receive one quarter of the sweets.

Is she correct? Explain why.

Yes, because 8 divided by 4 equals 2, and 2 is the quarter of 8.

Q.3) Ken says,

"One half of 20 is 5."

Is he correct? Explain why.

No, half of 20 is 10. 20 divided by 2 is 10.

Q.4) Mira has 12 pencils, she gives half of them to her brother and quarter of them to her sister. How many pencils does Mira have left?

Mira has 3 pencils. Half of 12 is 6, and quarter of 12 is 3.

So, $6 + 3$ is 9.

$12 - 9 = 3$ pencils.
