

# D

# Know Different Measures and Scales

What You Will Learn:

- Know the different measures and scales.

## Look Back

Which object is the shortest?

Tell your partner.

Vase X

Vase Y

Vase Z

**Vase Z is the shortest because it has the lowest height.**

## Thinking Cap

What can you use to find out which object is the shortest?

Compare your answer with your partner's.

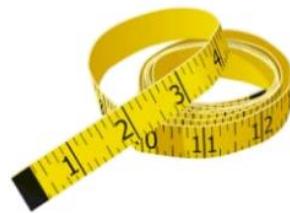

Do you agree?

Why or why not?

**I can use a ruler or a measuring tape.**

## Let's Learn

You can use a ruler or a measuring tape to measure length.

Length is a measure of how long something is.

You can use a kitchen scale to measure mass.

Mass is a measure of how heavy something is.

You can use a measuring cup or cylinder to measure capacity.

You can use a thermometer to measure temperature.

Temperature is a measure of how hot or cold something is.

## Let's Practise

1 Paste stickers on page 193 in the correct blanks.

Item:				
For measuring:	mass	temperature	length	capacity

2 Amy, Bala and Chong want to find out who the tallest person is among them.

What item should they use? measuring tape

3 Caz wants to bake a cake.

She needs to measure some flour and some milk.

Do you agree  
with Ralph?

No, I don't agree with Ralph

How can he improve  
his answers?

Caz needs to use  
a measuring tape  
to measure the  
flour and milk.

Caz needs a kitchen scale to measure flour  
and a measuring cup to measure milk.
