

A

The Solar System

Student's Book p.138

In this section, I will

- learn that the Sun is at the centre of the Solar System
- name the planets in the Solar System
- learn that planetary systems contain stars, planets, asteroids and comets
- explain relationships, quantities or scale through models
- explain why models do not fully represent a situation
- use science to help me support my points of view or actions
- describe how evidence obtained through enquiry has changed scientific knowledge and understanding over time
- identify people who use science around me and describe how they use it

Thinking cap

I know that Earth is a planet. I wonder if there are any other planets like Earth...

yes, Jupiter, Uranus, Mars, Venus, Mercury, Neptune , Saturn
