

**Rosary School / Marj El-Hamam**  
Science Worksheet (9.A.1)

Name : **Key answers**  
Date : \_\_\_\_\_

Grade 2 ( )

1. The Earth is the source of all the materials we use.  
Draw lines to match the materials with what they are used for.

2. The steps below describe a process.

- Obtain the ore from the rock.
- Heat the ore.
- Separate the metal from the ore.

Complete the sentence.

This process is carried out to **extract** metals from ores.

3. Oil and natural gas are extracted from the Earth.

Tick (✓) the box next to the correct statement.

- ☐ Oil and natural gas come from the rocks present in the Earth's surface only.
- ☒ Oil and natural gas come from the rocks present in the Earth's surface and under the sea.
- ☐ Oil and natural gas come from the rocks under the sea only.

4. Ron makes the following statement:

If humans use oil and natural gas too quickly, we will run out of them very soon.

Why would we run out of oil and natural gas?

Oil and natural gas take millions of years to form.

So, we will run out of them very soon

if we use them too quickly.

5. Rocks are examples of natural materials.

Oil and natural gas come from rocks.

(a) What are oil and natural gas?

Oil is a liquid found under the Earth's surface.

Natural gas is a gas found in the Earth.

(b) Many materials that we use are made from oil and natural gas.  
Name **two** such materials.

Plastic / Rubber / Fabric
