

A**Classify and Sketch
2D Shapes****Student's Book p. 75****Look Back**

Izzy puts some shapes into two groups.

Not Polygon	Polygon
	 octagon  pentagon

What is a polygon?

A polygon is a closed 2D shape with straight edges.

Do you agree with how Izzy groups the shapes? Why?

No. The heart-shaped photo frame should not be classified under 'Polygon' because it does not have straight edges.
