

## Thinking Cap

Caz thinks she can sort the plates and cups by size.  
Ron thinks he can sort them by shape.  
Who do you think is correct?  
Why do you think so?

P.139

They cannot be sorted by size since they are of the same size.

But they can be sorted by shape, such as by flat circulars, long circulars and cylindrical

Shapes are distinct / different and allow you to separate the objects clearly.

## Look Back

P.139

What do you see in the picture?

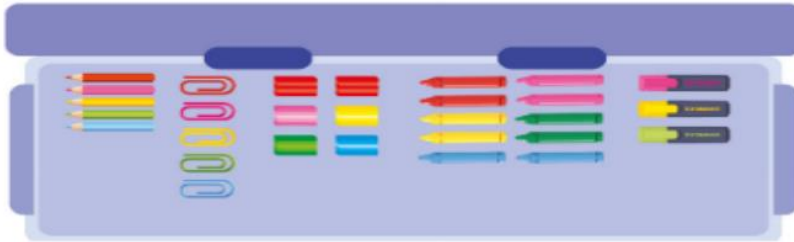

Talk to your partner about how you can sort data.

for example , separating plates from cups

## Let's Learn

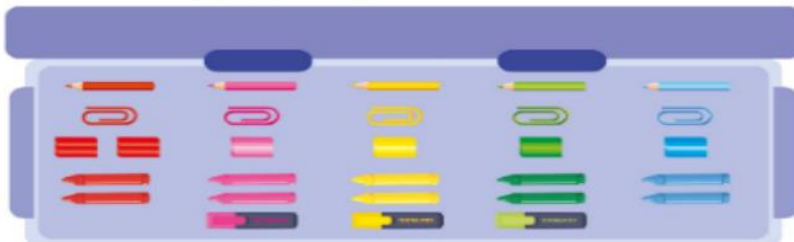

Lily has some stationery.

She sorts them by the type of stationery.

Vani has the same set of stationery.

She sorts them by colour.

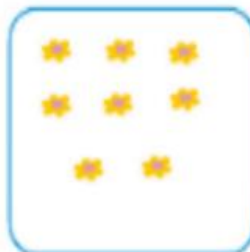

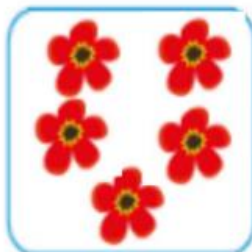

## Let's Practise

Sort the flowers by colour.

Use the stickers on page 250 to fill in the boxes below.

2 Ralph lists his favourite food.

Hot chocolate

Soup

Ice cream

Iced tea

Noodles

Popsicle

Sort the food in two ways.

First way

<u>hot</u>	<u>cold</u>
Hot Chocolate Soup Noodles	Ice cream Iced Tea Popsicle

Second way

<u>liquid type of food</u>	<u>solid type of food</u>
Hot Chocolate Soup Iced Tea	Ice cream Popsicle Noodles
