

Let's Practise

Student's Book p.144

a Find the perimeter of each figure.

b Draw a shape that has the same perimeter as Figure F on the grid.

Perimeter of Figure E

$$= 3 \text{ units} + 3 \text{ units} + 3 \text{ units} + 3 \text{ units} = 12 \text{ units}$$

Perimeter of Figure F

$$= 2 \text{ units} + 5 \text{ units} + 2 \text{ units} + 5 \text{ units} = 14 \text{ units}$$

Perimeter of Figure G

$$= 2 \text{ units} + 3 \text{ units} + 1 \text{ unit} + 3 \text{ units} + 1 \text{ unit} + 6 \text{ units} = 16 \text{ units}$$

- 2 Mrs Choo wants to fence her garden.

Student's Book p.144

The perimeter of her garden is 176 m.

Side A is shorter than side B.

How long can Sides A and B be?

$$50 \text{ m} + 62 \text{ m} = 112 \text{ m}$$

$$176 - 112 = 64 \text{ m}$$

Think of 2 numbers that
add up to 64

Perimeter of front yard = 176 m

Side A = 30 m and Side B = 34 m

3 Ron is thinking of a rectangle that has a perimeter of 24 cm

What is the length and width of the rectangle?

Draw the rectangle on a square grid.

Tick (✓) to show what you can do.

☐

I can find perimeter of 2D shapes.
