

What Are the Functions of the Skeleton?

Student's Book p.8

The skeleton ^{jobs} gives our body shape and provides support to it.

The spine supports the upper part of the body. It allows us to stand up straight and walk in an upright position.

Importance/Function of the spine.

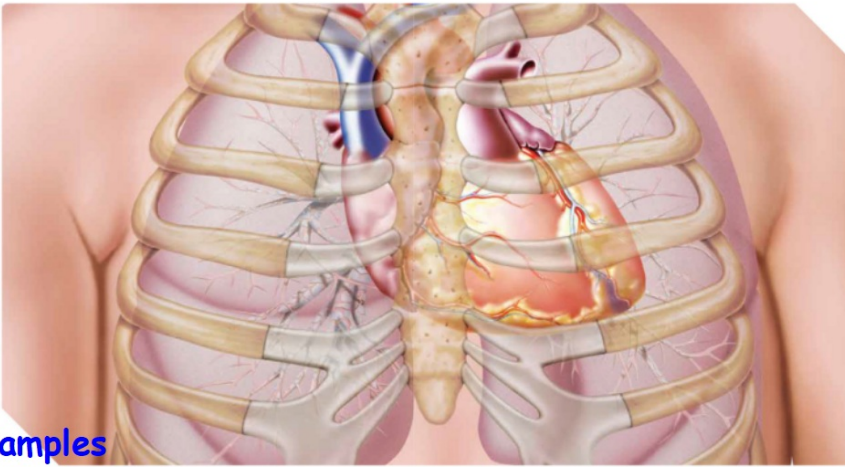

^{3.} The bones in our legs and arms help us to move around.

with the help of muscles

4.
The skeleton protects important parts of our body. (organs)

Student's Book p.9

examples

The rib cage protects organs such as the heart and lungs.

The skull protects the brain.
