

Student's Book p.4

Let's Explore!

What's in me?

X-ray images are special photographs that can show what is inside our bodies. Doctors and veterinarians use X-ray images to help treat broken bones in humans and other animals.

1. Look at these X-ray images. Which human body parts can you identify?
2. Write the names of the body parts below each image.

skull

knee

hand

spine
