

First step before regrouping any number is to decompose it.

Q6. Regroup the numbers.

We either regroup the ones while keeping the tens the same or regroup the tens while keeping the ones the same.

	$60 + 5 + 4$ $60 + 7 + 2$ $60 + 3 + 6$	$9 + 30 + 30$ $9 + 20 + 40$ $9 + 50 + 10$	
	$30 + 2 + 3$ $30 + 1 + 4$	$5 + 20 + 10$ $5 + 15 + 15$ $5 + 19 + 1$	we can regroup both tens and ones also $2 + 3 + 20 + 10$
	$90 + 1 + 1$	$10 + 80 + 2$ $20 + 70 + 2$ $30 + 60 + 2$	$50 + 40 + 2$ $10 + 20 + 30 + 30 + 2$ $91 + 1$ $88 + 2 + 2$
	$80 + 4 + 4$ $80 + 7 + 1$ $80 + 6 + 2$ $80 + 5 + 3$	$8 + 40 + 40$ $8 + 20 + 60$ $8 + 30 + 50$ $8 + 10 + 70$	$10 + 10 + 10 + 50 + 8$ $20 + 20 + 20 + 20 + 8$ $1 + 2 + 5 + 80$

Q7. Fill in the blanks.

We could use decomposing using numberbonds to help find the missing numbers (in regrouping).
