

Date: Answer key

Chapter 2 Section B : Multiply Numbers by 10 (2.B.1)

Objective: Use knowledge of place value to multiply whole numbers by 10.

- When we multiply any number by 10, we **shift** the digits one place to the **left** and we replace the ones with a 0.

Q1. Complete the chart below.

Q2. Find each **product** from the multiplication table of 10.

$8 \times 10 = \underline{80}$ $9 \times 10 = \underline{90}$ $5 \times 10 = \underline{50}$

$7 \times 10 = \underline{70}$ $3 \times 10 = \underline{30}$ $11 \times 10 = \underline{110}$

Q3. Fill in the blanks with the correct answer.

a) How many tens are there in 50? 5

b) How many tens are there in 80? 8

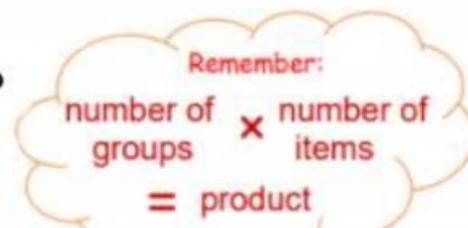

c) How many tens are there in 120? 12

d) How many tens are there in 100? 10

Q4. There are 10 pencils in a pencil case.

How many pencils are there in 3 pencil cases?

$$\begin{array}{r} \text{groups} \quad \times \quad \text{items} = \\ 3 \quad \times \quad 10 = 30 \end{array}$$

30 pencils

Q5. Answer the following with "true" or "false".

a) The **product** of multiplying any **whole** number by 10 will have a zero in the ones place. true

b) In multiplication, we can switch the order of the factors and still have the same product such as 10×1 and 1×10 . true

Q6. The cost of some items is shown in the table below.

Item	towel	comb	toothbrush
Cost	\$15	\$4	\$2

Sam bought 10 towels, 10 toothbrushes and 10 combs.

How much did he spend **altogether**? \$ \$210

$$\text{towels:} \quad 10 \times \$15 = \$150$$

$$\text{combs:} \quad 10 \times \$4 = \$40$$

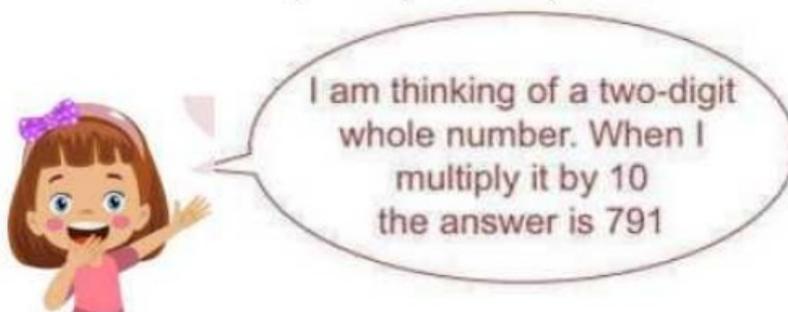

$$\text{toothbrushes:} \quad 10 \times \$2 = \$20$$

$$\$150 + \$40 + \$20 = \$210$$

Q7. Write the missing numbers in the two empty boxes.

$$\begin{array}{ccc} \boxed{36} & \xrightarrow{\times 10} & \boxed{360} \\ \boxed{84} & \xrightarrow{\times 10} & \boxed{840} \end{array}$$

Q8. Read what Yasmin says. Explain why she must be incorrect.

When we multiply any number by 10 we
will have a zero in the ones place value
We will never have a 1 in the ones place value.

Q9. Multiply and write the product.

$1 \times 10 = \underline{10}$

$88 \times 10 = \underline{880}$

$12 \times 10 = \underline{120}$

$7 \times 10 = \underline{70}$

$34 \times 10 = \underline{340}$

$19 \times 10 = \underline{190}$

$3 \times 10 = \underline{30}$

$10 \times 10 = \underline{100}$

$56 \times 10 = \underline{560}$

$0 \times 10 = \underline{0}$

any number multiplied
by 0 is always 0

Q10. Fill in the missing numbers.

a) 76 × 10 = 760

b) 840 = 84 × 10

c) one hundred and ten = 110

Q11. Sandy wants to buy 20 pieces of chocolate.

Each piece costs 10 cents.

How much money does she need to buy the chocolates?

groups × items =

20 × 10 = 200 cents = \$ 2

200 cents

number of groups × number of items = product

groups

items

Q12. Fadi has 10 bags, inside each bag he puts 5 toys.

How many toys will he have in **all** the bags?

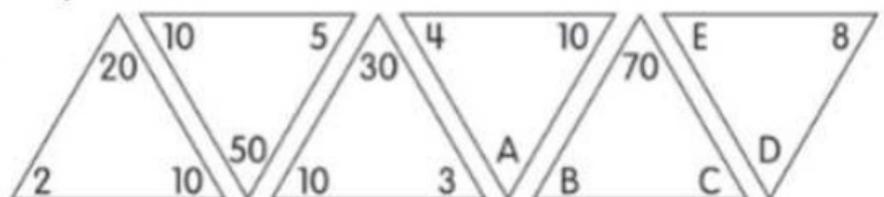

groups × items =

10 × 5 = 50

50 toys

Q13. The numbers make a pattern.

Complete the pattern.

A = 40

B = 7

C = 10

D = 80
