W.S (2.E.1) – Round Numbers to the Nearest 10 and 100

Objective: Round 2-digit and 3-digit numbers to the nearest 10 or 100.

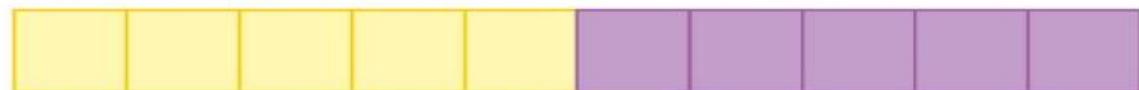

Rounding means making a number simpler – but keeping it close to the original!

When rounding to the nearest 10, we look at the digit in the ones place to help us decide whether to round up or to round down.

4 or less? Let it rest!
5 or more? Raise the score!

21, 22, 23 and 24 are closer to 20 than to 30.

20 21 22 23 24 25 26 27 28 29 30

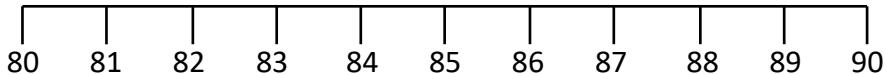

25, 26, 27, 28 and 29 are closer to 30 than to 20.
