## Chapter 2, lesson B: Medicines (2.B)

1. Why do we need medicines? Tick (✓) the correct answer.

- to prevent an injury from playing sports
- to prevent us from getting sick
- to treat illnesses

2. Answer the following with **true** or **false**.

- Different medicines treat different illnesses. (       )
- It is safe to take too much medicine. (       )
- To measure a dose, we use a dosing cup or a syringe. (       )
- Spoons come in different shapes and sizes, so we cannot use them accurately to take medicine. (       )

3. Read the call out then label the picture with **doctor** or **pharmacist**.

4. We can use a dosing cup to measure liquid medicine accurately.

Betty is taking the liquid medicine prescribed by her doctor.

**She needs to take 10 ml of the medicine.**

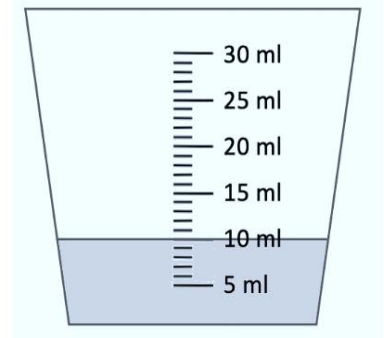

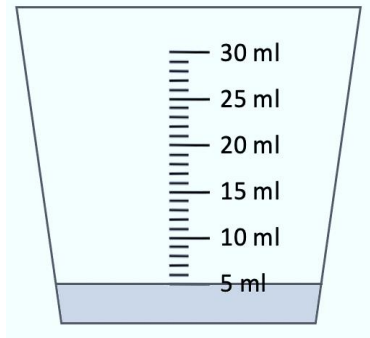

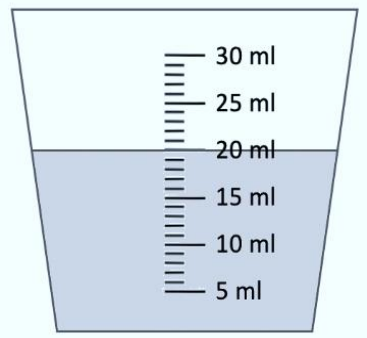

George is taking another liquid medicine prescribed by his doctor.

**He needs to take 20 ml of the medicine.**

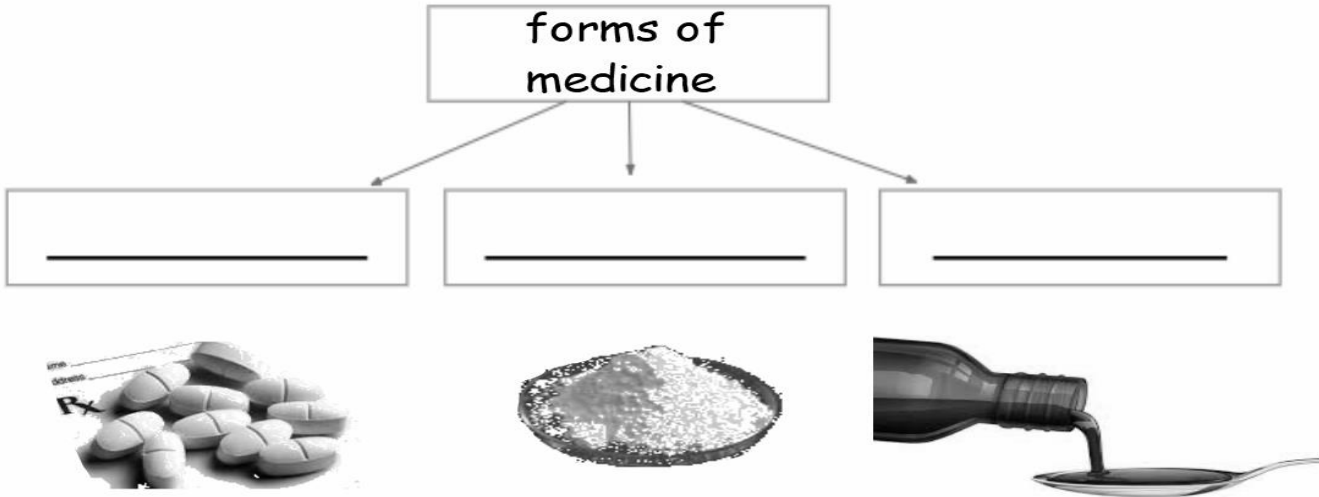

Dani is taking a different liquid medicine prescribed by the doctor.

**He needs to take 5 ml of the medicine.**

Write each person's name under the right measuring cup.

5. Medicines come in different forms.

Fill in the blank.

We use a dosing cup or a syringe to measure \_\_\_\_\_ medicine.

We cannot use spoons to take medicine because:

---

---

We should always follow the instruction paper that comes with the medicine.

Explain why.
