

# A

## Growing, Living and Being Healthy

Student's Book p. 43

In this section, I will

- state what plants and animals need to grow, live and be healthy

### Thinking cap

Do plants and animals need the same things to stay alive?

There are a few differences

### Plants need:

- water
- soil
- air
- sunlight
- space
- correct temperature

### Animals need:

- water
- food
- air
- shelter
- space
- correct temperature

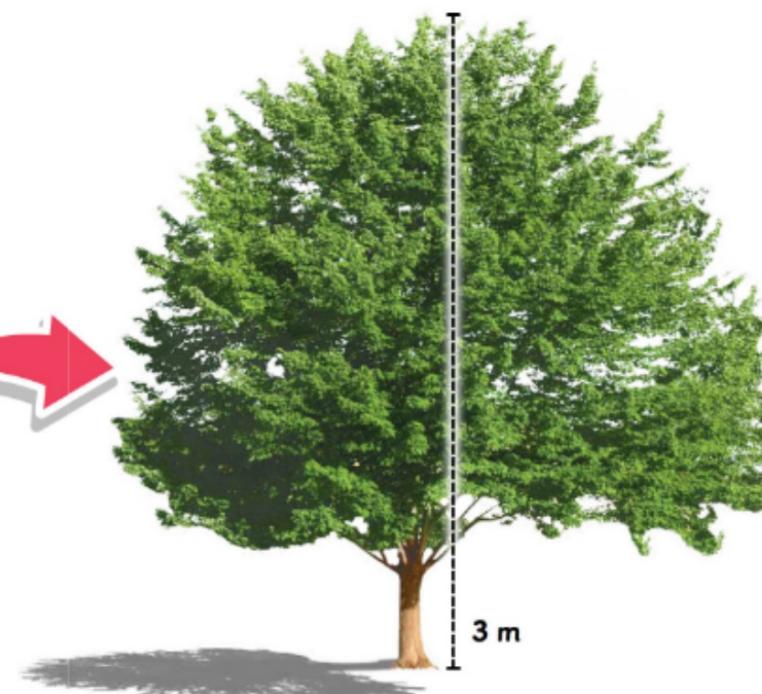

Do humans need the same conditions as animals to live and survive? **yes**

**Student's Book p. 43**

## **Let's Explore!**

### **All grown up!**

1. In pairs, compare the two pictures below.

2. Discuss these questions:

(a) In what ways has the plant changed? **It became taller and bigger**

(b) What does the plant need to grow into a tree? **Air, water, soil and sunlight**

## Student's Book p. 44

### Check Your Learning

Where do plants and animals get the energy to grow, live and be healthy?

Plants get their energy from sunlight.

Animals get their energy from food.

Tick (✓) to show what you can do.

I can state what plants and animals need to grow, live and be healthy.
