

Rosary School Mari Elhamam

Name: Answer Key
Subject: Lesson 3.A (Quadrilaterals)

Date: / / 2025
Grade : 5 ()

2D shapes

Shape Name	Parallel sides	Equal sides	Angles	Line of symmetry
Square 	opposite sides are parallel.	All sides are equal.	4 right angles.	4 lines of symmetry.
Rectangle 	opposite sides are parallel.	opposite sides are equal.	4 right angles	2 lines of symmetry.

Shape Name	Parallel sides	Equal sides	Angles	Line of symmetry
Parallelogram 	opposite sides are parallel.	opposite sides are equal.		No Lines of symmetry
Rhombus 	opposite sides are parallel.	All sides are equal.		2 Lines of symmetry
Trapezium 	one parallel sides			
Kite 	No parallel sides	adjacent sides are equal		1 Line of symmetry
