# Chapter 5 : 2D Shapes

Objective: Identify 2D and 3D shapes.

Recognize and name the properties of polygons.

Differ between regular pentagons and irregular pentagons.

Q1) Here are three 2D shapes.
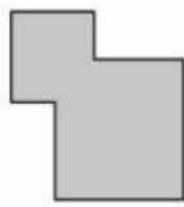

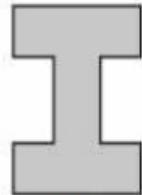

1 .... 4 .... 2 ....

Write the number of lines of symmetry for each shape on the answer lines.

Q2) Here are five shapes.

rectangle   regular pentagon   parallelogram

2 ....   5 ....   0 ....
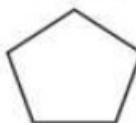

regular octagon   square
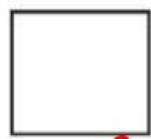

8 ....   4 ....

Write the number of lines of symmetry for **each** shape on the answer lines.

Q5) Here is a 1 cm dotted grid.
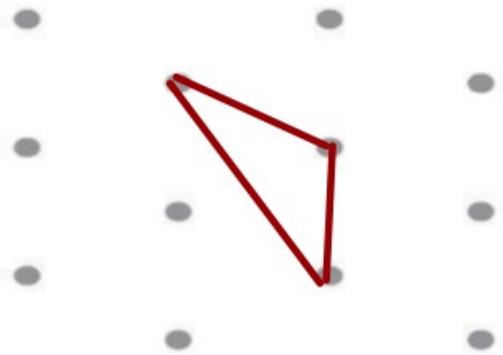

Join dots to make a triangle with only **one** line of symmetry.
