

What is this habitat? sea/ ocean (marine habitat)

What are some of the animals and plants that live in this habitat? fish/ turtles/ sharks/ coral

- Habitats on Earth are on land and in water.

for example: on land: mountains, desert, rainforests, woodlands

in water: oceans, river, lakes, wetland, ponds

- Animals that live in a habitat are suited to that habitat.

Student's Book p. 58

cats, dogs, birds, insects, foxes, snakes, ...

## Student's Book p. 59

### Let's Learn

#### What Are Some Habitats?

You have learnt that a **habitat** is a place in which an animal lives. A habitat provides the animal with food, water and shelter. and air

There are many different habitats on the Earth. There are deserts, mountains, grasslands, forests and polar regions. There are also aquatic habitats including oceans, rivers and lakes. Many different plants and animals live in each habitat. Animals that live in a habitat are suited to that habitat.

The polar regions are cold and there is ice all around. Animals there are suited to live in very low temperatures.

**aquatic**

relating to water

**suited**

having qualities that are right for a particular purpose

## Student's Book p. 59

The polar regions are cold and there is ice all around. Animals there are suited to live in very low temperatures.

### polar region

area around the North Pole or the South Pole

## Student's Book p. 60

Deserts are hot and have dry soil. There is very little rainfall. Animals living there have to be suited to the heat.

Rats

Camels

Tarantulas

Fennec foxes

Rattlesnakes

## Student's Book p. 61

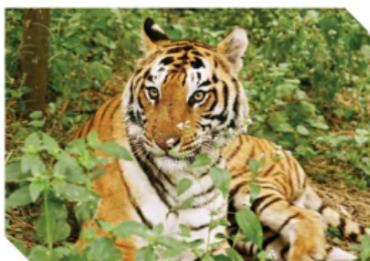

Tropical rainforests are usually warm, very humid and wet. Animals there are suited to live among the trees and plants.

### Word Boost

humid

When there is a lot of moisture in the air, it is humid out. The air in a rain forest is humid, the air in a desert is dry.

Tigers

Tree frogs

Orangutan

Toucan

Leaf insect

Snakes

## Student's Book p. 61

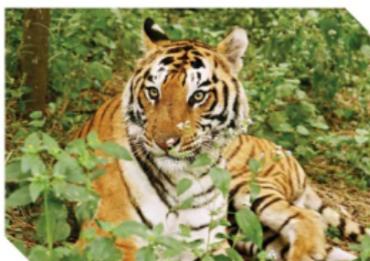

Tropical rainforests are usually warm, very humid and wet. Animals there are suited to live among the trees and plants.

### Word Boost

humid

Snakes

## Student's Book p. 63

Oceans have water that contains a lot of salt. Most animals there are suited 1 to breathe underwater. Other animals can hold their breath underwater for 2 a long time.

Dolphins

Sharks

Octopuses

Turtles

Sea cucumbers
